Subject: Juneau access

It's hard to believe that at a time that the state is considering asking the voters to approve a loan or a bond for transportation funding, we're still considering moving ahead with spending on extending the road from Juneau to some undefined dead end when there's no real assurance that this project will ever be completed, much less that this project is prudent use of limited funds.

Please drop this ill considered project from the STIP.

Sincerely,

Sue Libenson
